

Heterogeneous Evidence

Textual sources

FIR • Court judgment
Post-mortem • Lab
Deposition • SOCO

Image sources

Bloodstain • Wound
Fingerprint • Ballistics
Tool mark • Document

Modality-Specific Extraction

Schema-registry
text extraction

2-stage:
entities → relations

Strategy-based
image analysis

CV features +
LLM vision

Ontology-Validated Knowledge Graph

Ontology validation
38 node / 48 rel types

**Property graph
(Neo4j)**

entities, relations,
per-node embeddings

Graph-Centered Reasoning

Semantic search
(vector KNN)

NL → Cypher querying

Cross-case entity
resolution (SAME_AS)

Temporal reconstruction
& hypothesis support

*hypotheses written back
& embedded*
